■ Welcome to the catalogue.

This special catalogue will serve to help you with your selection and pinpointing of those products that you require for meeting your requirements in the Technical Furniture area.

Knürr designs, produces and integrates standardised and customised workstation systems.

Our customers set the requirements. And we respond with quality, flexibility, speed and perfect service.

Worldwide, we are recognised as a highly reliable partner in the areas of telecommunications and data communication, server and network technology, medical technology and, of course, security, automation and traffic control technology.

The product diversity and quality provided by Knürr has been setting traditionally recognised high standards for several decades.

Our standardised and customer-specific technologies are mirror image innovations of engineering know-how, which characterises and provides the impetus for the markets where we operate.

Perfected solutions developed with mechanical, electronic and thermal com-

ponents qualify us as one of the global market leaders for highly developed, modular rack and enclosure systems in the indoor and outdoor area.

Workstation systems require uniform spatial concepts - complex technological integration with the highest functionality available! And this we guarantee.

Mobile equipment carriers from Knürr are also one of the factors that create efficiency and autonomy in the laboratory, OP area, office or in the workshop.

The global presence, the innovative and aesthetic design, a mature palette of standard products and the recognised high degree of integration competence, supplemented by outstanding time-to-market results and above all the unsurpassed quality, can have but one conclusion:

Better

Workstations, integral planning

Ergonomics

The requirements of modern, **ergonomic workstation designs** are increasing all the time. This is because the design of the working environment, among other factors of course, influences the worker's performance and motivation.

We at Knürr consequently concentrate on industrial-related medical expertise in the development of our products. In doing so, Knürr makes a significant positive contribution to dynamics, efficiency and creativity in the work process. Scientific studies show that ergonomically well-designed workstations reduce the number of sick-leave days.

- A:** Optimal field of vision
- B:** Maximum field of vision without moving your head
- C:** Enlarged field of vision including proper head movement

ELI20022

ELI20001

The in-depth expertise of our qualified workstation experts incorporates every single aspect of ergonomics and modern room planning.

KON20070

Thanks to height adjustable surfaces, viewing distance and viewing height can be freely chosen and worktops that can be expanded at any time can be selected without restriction. Work heights can be adjusted to any level, manually or electrically. Legroom is also always guaranteed at the lowest desk position and in the swivel range with corner combinations.

Workstations, integral planning

Room Planning

Expert advice and professional concepts are the centre-point of every application solution: from the project planning and detail-exact design, through to the technical integration. Our proven workstation experts take ergonomic aspects into account, just as they do lighting and colour combination, compliance with standards, safety regulations and international standards. You have the benefit of profiting from our far-reaching experience in professional project administration and, thanks to our post-delivery guarantee, you also have the assurance of making a secure investment.

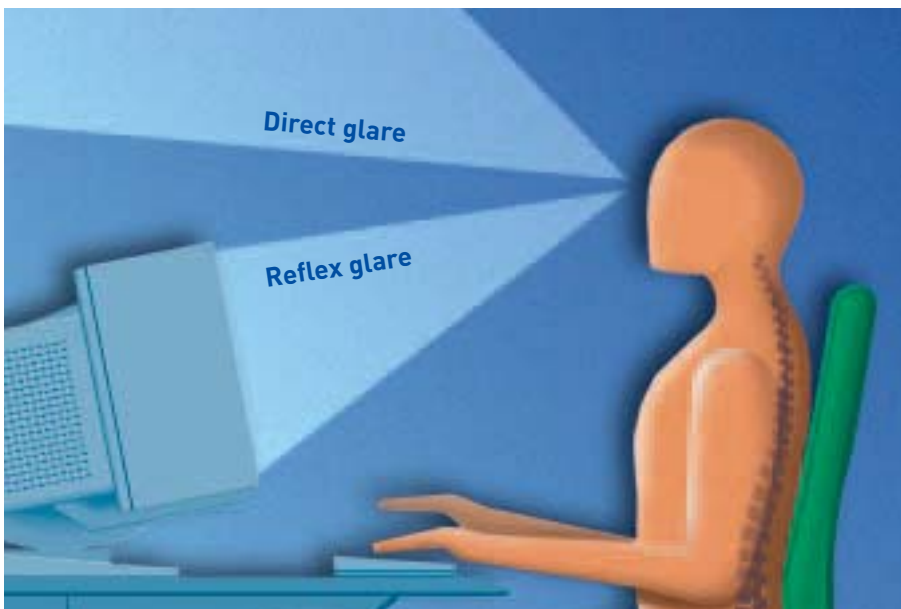

KON20050

Workstations, integral planning

Lighting

A whole series of factors must be taken into account when designing workstations. It is important to ensure that no interferences emerge with regard to field of vision. Aspects that at first glance appear to have nothing to do with the lighting, must also be integrated into the light planning:

ELI20024

- Depending on the work assignment, you should be able to use the work materials on the work worktop, in an orderly fashion and without any obstructions.
- Technology is continually being further developed and new work materials emerge, which create new demands on the workstation, and as a result, on the work environment in general.
- Work surfaces are designed in many cases with several angled modular surface sections.

- Office surfaces are planned and designed in accordance with DIN 4543 Part 1.

The availability of direct lighting must not, of course, be overlooked. Required here are lighting systems that provide those working at the station with the highest degree of flexibility.

Monitor workstations have very high requirements for workstation lighting.

Workstations, integral planning

Standards & Guidelines

The demands for modern, ergonomic workstation designs are always increasing. This is because the design of the working environment influences the worker's performance and motivation.

We at Knürr consequently concentrate on industrial-related medical expertise in the development of our products. This is our contribution to positive dynamics, efficiency and creativity in the work process.

In the areas of design and development, Knürr follows the generally applicable design rules for office furniture, consoles and control consoles.

Quantitative and qualitative evaluation of the lighting:

The Light Flux

The entire optical power radiated from a light source is described as the light flux and is given in the physical unit, Lumen (lm). The exact value for the light flux of a lamp is given in the product description of the lamp manufacturer.

The Intensity of Illumination

The light flux quotient and the surface on which it falls corresponds with the intensity of the illumination (E). It is generally determined on horizontal and vertical surfaces and given in the unit, Lux (lx = 1 lm/m²). As the intensity of illumination can be relatively easily measured and calculated, it is consulted as a planning variable, although it does not represent the brightness that humans are sensitive to.

Brightness

For the apparent brightness, which is detected by the viewer's eye from a lit or self-lighting surface, the brightness or luminance (L) is decisive. The unit of measurement of this light-technical basic variable is the Candela per square metre (cd/m²).

Luminosity

A lamp does not generally radiate in equal strength in every direction. The light intensity (I) corresponds with the portion of the light flux, which is emitted in a certain direction. Its physical unit is the Candela (cd). The emission characteristic can be described for documentation purposes with the aid of a light distribution curve, with which the measured light flux in the symmetry levels of the lamp, e.g. the so-called C-levels, are applied in the form of a polar diagram.

Want to get to know us better? We are always just a click away.

It really is almost totally unimportant where you happen to be on the face of the earth! If you want to let yourself be impressed by the Knürr Group product and services range, numerous platforms are always available at your fingertips. Internationally represented in 32 countries world-wide and with domestic companies and overseas affiliates, we are strategically best positioned for you and your requirements.

On the Internet at **www.knuerr.com** in addition to current news and updates, you will find our entire product range, including technical data, press releases and background information and specialist articles. Knürr product experts are omnipresent at numerous national and international trade fairs to answer your questions and provide you with specialist advice.

If you want to implement your workstation systems with the Knürr Group, we're ready and waiting to come to you!

Desk Systems

Applications and Capabilities

Our ergonomically refined control consoles are used the world over and perform with excellent results in traffic control and airport operations and control centres. The demanding 24-hour operation in such environments is, of course, every bit as demanding on the operators and the technology in use.

The ergonomic workstation is important for the operator, just as the functionality of simple and rapid access is, so that the necessary components for the operation can be exchanged within minutes. This is where Dacobas shows its strong points. - A transparent modular structure for creating the efficient interface between the control systems and the people that operate them. A flexible linking of the modules consequently enables the creation of the most diverse workstation environments.

KON20058

DAC20006

DAC20116

Control and measurement consoles in the process industry are closely linked to the production process, and are therefore often exposed to quite severe conditions. In this area, ergonomics is again at the forefront, however, different technologies are utilized in each production process, which requires a high standard of flexibility with the technical integration. This is where Dacobas can fully implement the strengths that it has continually further developed over several decades.

Office organisation and technical integration are enabled with a wide range of individual, configurable desk pedestals.

- 1 Desks are afforded a high load rating with a strong (50 mm) steel frame and a postformed desktop (70 mm).
- 2 The patented quick connect system guarantees simple and strong link-up of desk, cabinet and corner elements.
- 3 An easily assembled cable duct provides covered vertical routing of data and power supply cables.
- 4 Tapped thread in the top end of the extrusion allows adapters to be mounted for practical accessories.
- 5 Additional work and storage surfaces are created with desk-top superstructures. A simple plug/screw connection enables vertical link-up for workstation superstructures, e.g. a second working level or lighting fixtures.

All workstations are also available in ESD version as required.

dacobas Desk Systems
Technical data

Material / Finish

- Desk frame, sheet steel, zinc passivated
- Three layer particle board, FP/Y E1 version, fire protection class B 2
- Worktop covered with high pressure plastic laminate
- Desk legs, extruded aluminium, powder-coated texture
- Cover panels, three layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Drawer trims and drawer handles, plastic (PS)

Colour

- Final digit of order number .1:
- Worktop: light-grey
 - Legs: RAL 5008, grey blue
 - Cover panels, drawer trims and drawer handles: light-grey

Load rating

Tested static surface load, 1500 N

Standards

- DIN 68761 for worktops
- EN 438 HGS class for high pressure plastic laminate

Note

Please order socket strip separately

How supplied

- dacobas desks and combi desks are fully assembled
- dacobas add-on desks are supplied separately in modules

dacobas Desk in ESD Version

dacobas 19" Superstructure

- 19" Superstructure for mounting chassis', 19" modular chassis' and panels
- Front and rear side of the superstructure with 19" extrusions for fitting chassis' and modules in the 19" system and blanking plates
- Complies with IEC 297; the superstructure provides an additional working level and storage surface
- Link-up extrusions for fixing on desk

■ Dimensions

Installation depth, 365 mm

■ Standards

- DIN 68761 for worktops
- EN 438 HGS class for high pressure plastic laminate

■ Material / Finish

- Top and bottom cover, sheet steel, powder-coated texture
- Top cover: three layer particle board, FP/Y E1 version, fire protection class B2

- Side covers: three layer particle board, FP/Y E1 version, fire protection class B2
- Link-up extrusions: extruded aluminium, powder-coated texture
- 19" Extrusions: extruded aluminium

■ Colour

- Top cover and side covers: light-grey
- Top and bottom cover: RAL 9011, graphite black
- Rear panel: RAL 7035 light-grey
- Link-up extrusions: RAL 5008 grey blue

■ Installation options

- 3x10 U
- 3x13 U
- 3x16 U

■ Supply schedule

- Bottom cover
- Metal cover
- Rear panels
- Top cover

Mini Distributor for Dacobas

- The mini distributor is based on an extruded aluminium extrusion. T-slots and screw channels are used to mount trade standard installation technology. The mini distributor can be equipped at the front with 3 HU front panel sections. With the adapters on the side, the mini distributor can be mounted on the Dacobas desk and workbench system.

■ Material / Finish

- Aluminium extrusion, antistatic powder-coated texture, RAL 7035
- Adapter: sheet steel, antistatic powder-coated texture, RAL 7035

■ Supply schedule

- 1 Mini distributor extrusion
- 2 dacobas extensions
- 2 Mounting adapters
- Mounting material

■ Attention!

To ensure protection against electric shock, empty slots must be covered with front panel sections.

■ Note

The appropriate installation components can be found in the accessories catalogue

Dacobas

Control Consoles

A special product area of the Dacobas range is dedicated to the technical features of control consoles. This standard range enables the covering of most requirements, especially for invitations to tender - cost-effective, efficient and short delivery times.

Technical pedestals, lowered monitors, 19" integration, cabling systems, console superstructures and flat screen holders generate an all-inclusive range that covers practically every requirement.

Any gaps that may still exist between the standard offer and your request are taken care of with modifications to the standard and special constructions carried out by our customer engineers.

Dacobas Control Consoles Strong points

1 Ergonomics

Full front cover provides modesty screen for the leg area. The ergonomic leg space enables free movement of the chair in the link-up area. Spacious desk depth of 1000 mm for setting up 21" monitors.

2 Cable routing

For cabling and installation of equipment, front and rear covers completely removed.

3 Simple and dust protected cable entry from above in the cable duct. Brush strip across the entire desk width.

4 Monitor level

CRT monitors and flat screens can be set up on the monitor level which is set at a lower height. Height and tilt of the monitors can be set individually with inlay panels.

5 Cable management

Separate horizontal and vertical cable routing in cable basket trays and cable routing rings. Easy cabling also via corner components.

6 The technical pedestal with a depth of 350 mm provides the option of integrating computers, mounting panels and 19" components.

7 Cable duct bottom opening of the double base in the technical pedestal or through the brush strip in the 19" pedestal. Optional ventilation in the covers.

8 19" Pedestal

Small smaract cabinet² with glass door and 19" extrusions for installing 19" components. Adapter for installing a lockable drawer, can also be mounted later on.

9 Drawer unit

Mobile drawer unit, 1/3x3 OU or 1/3/6 OU, can be positioned anywhere.

Dacobas

Flat Screen Consoles

TFT Monitors, i.e. flat screens, are rapidly displacing the “tube technology” used to date. The space saving in the depth with desk and workbench systems is, of course, only guaranteed with a flat screen holder system, which makes the large support feet of the TFT unnecessary.

With systems with several flat screens, flat screen adaptations are a “must” at any rate.

Planning right from the outset with TFT adaption is the ideal solution, but flat screen adapters can also be integrated at any time later on, and this even with third party manufacturers.

KON20050

Dacobas Flat Screen Consoles
Strong points

1 KON20049

2 KON20050

3 KON20053

4 KON20054

4 KON20055

5 KON20057

1 Modular concept

The trapezoid shape of the individual consoles creates a circular setup when linked-up, and consequently produces an optimal horizontal view and access area.

2 With straight and trapezoid shaped workstation components, individual workstation environments and combinations can be realised.

Linked-up technical desks extend the worktop surface.

3 Flat screen adapters

The flat screen adapters comply with the VESA standard 75 and 100 (drill hole spacing, 75 mm and 100 mm).

The arrangement of flat screens on two levels is enabled with Knürr-specific functional rails.

4 Equipping

The pedestal can be opened from both the rear and the front and is equipped with a pull-out shelf. Both 19" equipment and mounting panels for non-standard equipment can be mounted on 19" extrusions.

5 Printer cabinet

Printer cabinet for process printer with printer and printer paper tray. The glass cover above the printer can be opened to take paper out.

Dacobas

Operator Consoles

CRT monitors cannot be replaced by flat screens in some special applications. Dacobas operator consoles that optimise screen reflexes, access, viewing angles and distances as well as heat dissipation are provided for such special applications.

A simple exchange of the heavy monitors is of decisive significance in this respect.

KON00076

dacobas Operator Console
Strong points

KON00248

1 KON00254

4 KON00244

2 KON00287

3 KON00260

5 KON00246

- 1 The inclined sinking of the lower monitor surface and tilting of the higher monitor surface by 5° enables a vertical ergonomic viewing angle of the monitors. The trapezoid shape of the consoles creates a circular superstructure when linked-up, and consequently produces an optimal horizontal viewing and access area. Version also possible for flats creens.
- 2 Link-up trapezoid workstations extend the worktop surface. The brush strip enables cable routing at any position.
- 3 Monitor settings can be easily made with the folding and removable front trims. Reflections are significantly reduced with the reflex-proof Conturan glass. The areas outside the monitor are covered according to customer specifications.
- 4 The hole perforations and the internal sound absorbing panel on the rear door absorb the operations noise. The lockable rear door guarantees access protection and can have a door stop on either the right or the left.
- 5 The pull-out monitor shelves can be set variable and consequently adjusted to the viewer and the monitor size. The horizontal cabling can be continued via cable ducts in linked-up consoles and trapezoid workstations.

dacobas Operator Consoles

Technical data

Material/ Finish

- Rear door of sheet steel, powder-coated texture, RAL 7035 light-grey
- Top cover and worktop: three layer particle board, FP/Y E1 version, fire protection class B2
- Top cover and worktop coating: coated with high pressure plastic laminate
- Pull-out shelves and monitor shelf: perforated, sheet steel, powder-coated texture, RAL 9011 black
- Sheet steel frame, powder-coated texture, RAL 9011, black
- Desk leg, extruded aluminium, powder-coated texture
- Rear panel, foot space covers and side covers: three layer particle board, FP/Y E1 version, directly coated, fire protection class B2

Dimensions

- Technical pedestal:
useful depth, 245 mm
useful height, 585 mm
useful width, 500 mm

Colour combinations

- Final digit of order number .1
- Plastic laminate, RAL 7035 light-grey
 - Desk leg, RAL 5008, grey blue

Load rating

Tested static surface load, 750 N

Standards

- DIN 68761 for foot space cover, top cover and worktop
- EN 438 HGS class for coating material

Note

Monitor type and data sheet must be provided with order. Monitor size is required for adjusting the panel sections. Please order socket strips separately. Link-up plan must be provided with order!

Internal equipping

With "one-tier" console

- 1 Bottom cover with large cutout (all-round margin: 30 mm)
 - 1 Monitor shelf with perforations (airflow) with buffer/stop for monitor, height and tilt adjustable
 - 1 Pull-out shelf with perforations, mounted at the lowest position so that a useable height of 250 mm or 347 mm is guaranteed
- A 4-way socket strip is mounted on the lower area of the rear extrusion of each monitor carrier

With "two-tier" console

- 1 Bottom cover with large cutout (all-round margin: 30 mm)
- 2 Monitor shelves with perforations (airflow) with buffer/stop for monitor, height and tilt adjustable
- 1 Pull-out shelf with perforations, mounted at the lowest position so that a useable height of 250 mm or 347 mm is guaranteed

Dacobas

Height Adjustable Control Console

The new Knürr Security Command Workstation is de-signed as a versatile control console with the comfort and convenience of a sit-stand workstation. The variable, electric height adjustment of 680 mm to 1120 mm work-ing height is even possible with angled combinati-ons. With operations control consoles, it is crucially important that the operator be able to work standing up in stressful operation situations. The stressful siutaion is consequently less demanding for the operator and the error rate is lower.

KON20047

We are happy to offer project planning and offers with detailed CAD room planning on request.

KON20048

This intelligent technical concept is the basis and foundation of all Knürr products.

Whether it be conventional monitors of all sizes or modern flat screens, both can be easily integrated into the Knürr Security Command Workstation.

In addition, the life cycle of Knürr's consoles guarantees the value and security of your investment.

Electric height adjustment of monitor levels for flat screens and CRT monitors regardless of the working level.

Comfortable electric sit/stand height setting for angle combinations with a specially developed "Black Box" control.

Practical technical integration with access from front and rear. Spacious pedestals.

Robust, ergonomic desktop edge, also with free-form surfaces.

Intelligent cable management in spacious cable ducts.

Horizontal and vertical cable management, refined protection.

Dacobas

19" Cabinets and Accessories

Technical systems are not installed in large numbers directly in the workstation system for the most diverse reasons, but rather alongside or in a special central technical room.

In order to ensure that furniture system and 19" cabinet system are compatible with each another, Dacobas provides a correspondingly designed 19" range.

Dacobas is additionally rounded off by an accessories range, which covers other special applications.

Elicon Workstation Systems in Practice

Applications and Capabilities

The requirements for **modern workstation designs** are constantly increasing. And regardless of "where" you work, whether it is in a call centre, a security control station, at an electronics or programmer workstation or computer control station, the decisive criteria here is always "how".

The **optimal design** of the working environment - and this is increasingly more evident - enhances the motivation and efficiency of every individual employee. Because corporate success can only be truly realised when functionality and flexibility, quality and safety, timeless design and, needless to say, **ergonomics** result in a successfully implemented synthesis. Our workstation systems have proven to be a crucial contribution in this respect.

1 CON20038

1 Wach- & Schließgesellschaft, Hanover
Security control centre

2 State Agency for Ecology, Hanover
Computer control station

3 DaimlerChrysler, Stuttgart
Team workstation

CON20037

2 CON20039

The **Elicon workstation range** complies with all current EU guidelines for safety in the workplace for office and monitor workstations. The basic modular concept enables flexible and individual combinations. Elicon consequently provides all the advantages of a forward-thinking end-to-end system.

3 CON20040

1 CON20064

2 CON20042

3 CON20043

Elicon Strong points

1 Modular construction

Simple link-up of the modules enables individual room planning.

2 Flexible working heights

Working heights optionally adjustable at 20 mm increments (can also be changed at any time) meet ergonomic requirements.

3 Cable management

Spacious horizontal and vertical cable ducts are component parts of the basic equipment. Convenient access to the cable duct from above through the desk and system superstructure sliding sections.

4 CON20046

4 Cables are routed in the cable ducts using **removable covers** inside and outside on the side panels.

5 Providing electricity

Cable troughs and crosspieces are equipped with a cap extrusion for easy mounting of socket strips and installation components. Electricity is consequently provided to a large extent as, "individually".

6 Ergonomics

Keyboards are placed conveniently on the fully extendable keyboard extension with ergonomically inclined, strong and stable telescopic slides.

5 CON20044

6 CON20048

CON20046

CON00065

Elicon System Components Side piece for control station

- Segmented cable duct cover on the outside and inside
- Vertical cable routing in the spacious cable duct
- Cable duct covers of sheet steel with hinge function for easy cabling
- Mounting of superstructures and add-on levels (rear), and other components
- Mounting option for additional foot stabilizer at the rear to increase stability with add-ons
- Pre-mounted lock strips for simple and secure assembling of the working levels (680 - 760 mm, increment 20 mm). Any work height can be set at any time simply by turn-ing a screw.

Variants

- Type 1
 - Side piece with short stabilizer for working levels with depth 700 mm
- Type 2
 - Side piece with long stabilizer for working levels with depths 800/900/1000 mm

Material/Finish

- Extruded aluminium with diecast alu-minium stabilizer and head piece, antistatic powder-coat textured
- Cable duct cover: sheet steel, rolled, antistatic powder-coat textured

Colour combination

- Final digit of order number .2:
 - Metal parts: RAL 7035 light-grey
 - Design elements: RAL 5003 sapphire blue
- Final digit of order number .4:
 - Metal parts: RAL7035 light-grey

rapomos 19" Superstructure for Elicon

Strong points

1 RAP00197

Flexibility

- 1 Individual combination and arranging of the functional modules/ components
- 2 Quick start-up operation with pre-assembled and wired structural units
- 3 Easy exchange of modules / components on the rapomos superstructure with integrated power supply bus system, and consequently, optimal adjustment
- 4 Variable system link-up with the extensive Elicon desk and superstructure range

2 RAP00132

3 RAP00133

4 RAP00167

Mini Distributor Strong points

RAP20034

- Aluminium extrusion with antistatic powder coating
- Easy mounting, can be upgraded at any time
- Versions for all Knürr desk and workbench systems
- Can be mounted at angle $\pm 5^\circ$
- Flexible installation of the most varied electro components in screw channels and T-slots for spring nuts M4 – M6
- Problem-free cable separation using retrofittable metal brackets
- Front panels must only be screwed at the top, hidden at the bottom
- Front panels earthed with earthing spring strips
- Lateral tolerance equalization with frontal folding of the side panels

RAP20030

Mini distributor for Elicon

- The mini distributor is based on an extruded aluminium extrusion. T-slots and screw channels are used to mount trade standard installation technology. The mini distributor can be equipped at the front with 3 HU front panel sections. With the adapters on the side, the mini distributor can be mounted on the Elicon desk and workbench system.

- **Attention!**
To ensure protection against electric shock, empty panels must be covered with front panel sections.
- **Note**
The appropriate installation components can be found in the accessories catalogue

- **Material / Finish**
 - Extruded aluminium, antistatic powder-coated texture, RAL 7035
 - Adapter: sheet steel, antistatic powder-coated texture, RAL 7035

- **Supply schedule**
 - 1 Mini distributor
 - 2 Mounting adapters
 - Mounting material

rapomos 19" Structural Rack, 3 and 6 HU for Elicon

RAP00166

- For mounting 19" modular chassis' and rapomos modules
- Structural rack with or without mains power supply bus, this includes
- Connection cable approx. 2.5 m with protective contact plug
- Modular terminal block per 19" panel with connection of up to 6 individual devices
- Max. installation depth: 445 mm
Max. installation depth with mains power supply bus: 375 mm
- As 19" trapezoidal structural rack for desk width 1200 mm (for corner connections) with 2x19" installation option
- Assembly tilt setting of +/-6° in 3° increments or variable tilt setting of +/-6° with the crank handle (not possible with trapezoidal structural rack for corner connection)
- Variable height adjustment
- High 19" construction load rating per 19" chassis, 3 HU = 200 N
[example: with a 19" construction of 6 HU with a width of 1600 mm and a mounting of 6x19" chassis', the load rating is 6x200 N = 1200 N]
- Additional storage levels with high surface load capacity of 750 N
- Integrated ventilation concept for optimal cooling
- Service-friendly with easy mounting

Material / Finish

- Housing: sheet steel, antistatic powder-coated texture, RAL 7035 light-grey
- Side cover: die-cast aluminium

Supply schedule

- 1 19" Structural rack
- 2 Chassis rails per 19" / 3 HU installation panel

Smaract 19" Pedestal for Elicon

CON20051

- 19" Pedestal, installation height, 12 HU
- 19" T-slot extrusion for variable mounting of installation components
- Shortened bottom on the rear metal door
- Cover panel with cable port on the rear, top
- For components in accordance with IEC 297-3

Material

- Extruded aluminium
- Corner connector, die-cast aluminium
- Covers, powder-coated texture
- Glass door: sheet steel with single safety glass panel
- Metal door: sheet steel

Model

IP 20

Space solution

82% of the basic surface can be used as space for installation and cable routing

Finish

- Basic frame: polished
- Covers, front and rear doors, RAL 7035 light-grey

Tests

- Safety in accordance with EN 50298 and EN 60950
- Protective conductor/earth in accordance with DIN VDE 0701-1
- IP test in accordance with DIN EN 60529

Supply schedule

- 1 Basic frame
- 2 Closed side panels
- 1 Shortened rear door
- 1 Cover panel with cable routing
- 2 19" Aluminium vertical extrusions, at the front, with T-slot
- 1 Earthing set

Elicon Office

Office range

32 to 36

Elicon Office
Strong points

■ CON20055

- The ideal supplement to the Elicon computer control station or Elicon control console.
- The office elements of the ELICON product line are the perfect supplement for computer control stations and control consoles or they can be used as independent office equipment.
- This product meets all international requirements for ergonomically formed monitor workstations. The two desk depths, 800 mm and 900 mm, and the height adjustment at increments of 20 from 680 to 760 mm enable an optimal adjustment for both the employees and the different monitor sizes.

■ CON20056

- The integrated, standard version horizontal cable duct enables tidy, orderly cable routing. And of course, a cable duct is also included with the corners.
- Adapting TFT monitors and accessories via functional rail with workstation superstructure. Three different widths are available.

CON20011

Elicon Office Side Piece

- Preassembled lock strips for simple and secure mounting of the work levels (680 - 760 mm, increment 20 mm). Can be set at any work height, at any time, simply by turning a screw.

Material / Finish

- Extruded aluminium with diecast aluminium stabilizer and head piece, antistatic powder-coated texture
- Cover: plastic ABS

Colour combination

- Final digit of order number .2:

- Main unit, top cover, drawer trim and handle: light-grey
- Final digit of order number .2:
- Main unit, top cover and drawer trim: light-grey
- Handles: RAL 5003 sapphire blue
- Final digit of order number .5:
- Metal unit, drawer trim and handles: RAL 7021 dark-grey
- Top cover: beech finish

Load rating

400 N per twin swivel castor

Standards

- Main unit and top cover, DIN 68765
- EN 438 for high pressure plastic laminate

Note

With Elicon the D 800 mobile drawer unit can be used from a working height of 720 mm

On request

Unit with various locking; with general key

Supply schedule

1 Mobile drawer unit, 10 OU

How supplied

Assembled

DAC00274

DAC00279

Mobile Drawer Unit Also in ESD model

- Main unit and top cover: volume-conductive, three layer particle board, FP/Y E1 version, fire protection class B2, directly coated
- Drawer trim in wooden version, three layer particle board, FP/Y E1 version, fire protection class B2, directly coated
- Drawer handle (PS) conductive, black
- Meets requirements of EN 61340 and EN 438

Colour combination

- Main unit and front trim: light-grey
- Handle: RAL 9011, black

Tests in accordance with

IEC 61340-5-1, EN 438 parts 1 + 2

Elicon Control Console

38 to 42

Elicon Control Console

Applications and Capabilities

The migration of PC technology to control stations and measurement consoles for controlling and monitoring work results in the ever increasing deployment of Elicon products. The most simple integration of technology conceivable, flexibility and future-orientation, regardless of whether CRT or TFT monitors are utilised. Leg space across the entire width and on request design of free-form worktops make Elicon the perfect control station in 24-hour operation environments.

CON20014

CON20063

Elicon Control Station Height adjustable

1. Advantages of height adjustment

- Changes between sitting and standing positions
- Adaption of the worktop height to the respective work purpose
- Dynamic working conditions
- The workstations are available in widths: 800, 1200, 1600 and 1800 mm; side piece, H 1249 mm

2. Setting range

- Workplace guidelines and standards require sit/stand workstations to have a setting range of at least 440 mm (680 mm - 1120 mm). Our spindle stroke system has a setting range of 500 mm; this results in an adjustable range of 680 mm - 1180 mm

Colour combination

.2: Worktops and frame - RAL 7035, light-grey. Head pieces - RAL 5003, sapphire-blue

.4: Worktops and frame - RAL 7035, light-grey. Head pieces - RAL 5018, turquoise-blue

3. Drive

- Our electronic workstation height adjustment detects the different weights and synchronizes the drive at "always level".
- The stroke is 37 mm/sec.
- Fully driven out in 13.5 sec.
- Pleasant drive sound
- Two fixed heights programmable → personal assignment of the respective ideal position of the user
- Miniaturisation makes the drive practically invisible
- Synchronised control in small switching unit in the cable duct
- Control console in the access area under the worktop
- Operating time, 6min/hour and 2 minutes permanent
- 1500 N (max. surface load)

Note

Model available on request with short side pieces!

Want to get to know us better? We are always just a click away.

It really is almost totally unimportant where you happen to be on the face of the earth! If you want to let yourself be impressed by the Knürr Group range of product and services, numerous platforms are always available at your fingertips. Internationally represented in 32 countries world-wide and with domestic companies and overseas affiliates, we are strategically best positioned for you and your requirements.

On the Internet at **www.knuerr.com** in addition to current news and updates, you will find our entire product range, including technical data, press releases and background information and specialist articles. Knürr product experts are always present at numerous national and international trade fairs to answer your questions and provide you with specialist advice.

If you want to implement your workstation systems with the Knürr Group, we're ready and waiting to come to you!

Mobility in practice

Applications and Capabilities

New workstation concepts, production procedures, services and support services are increasingly being determined according to the, "Flexibility through mobility of tools and instruments in use" guideline. Nowhere is this more evident than in the field of diagnostics and therapy in the medical world.

But it is also more efficient in the automotive industry to drive the highly-valuable diagnostics equipment to the vehicle than the other way around.

And what's really appealing! For each application, we design individual workstations, which are ergonomically, technically and optically refined for special working situations.

Project Planning

If a new workstation solution is to be realised from the starting point, the first thing to be focussed on is the detail-exact project planning. With the integration of numerous factors - from the creation of a list of functional specifications, the budgeting and deadline planning, through to special design specifications and technical integration, right on through to the compliance with standards and guidelines - our competent product experts put themselves to the task of working on your requirements.

During the initial stage of the project, all important questions are discussed and the relevant data is gathered together, evaluated and compiled in a transparent offer. Now we have a common basis for the individual product production!

Design and function

Design

Using the most modern CAD applications, we design your products, which set new standards in terms of technology and aesthetics. On the basis of the project planned details, 3-D views, design studies and volume models emerge, which represent the most realistic state of development progress and enable modifications in line with your wishes at absolutely any time.

Your company-own corporate design is also integrated with our proposals for materials and colour. Ultimately we ensure a smooth technical and technological integration while complying with UL, CSA, VDE or TÜV/GS standards. Only when these stages have been fully completed, can the first prototype be produced.

MOB20020

Exemplary results

Project Work

Depending on the complexity of the task at hand, we put together a professional team of specialists from the most varied of disciplines. Our project manager undertakes the **project planning** in accordance with your individual requirements profile. During the **product design** phase, industrial designers and technicians work together to harmonise form and function.

The **prototyping** is firmly in the hands of experts who are hard at work on the requirements provided by you the customer. And in the **production** phase, our employees guarantee the best product available with their long years of experience in supply chain management, production and quality assurance.

MET0003

MOB20039

MET00034

MET00037

■ Variability

- A completely individual mobile trolley can be put together from a basic trolley in 2 heights, 3 colours and 5 module components.
- Ideal height adjustment with variable height setting of the shelves

■ Stability

- High load rating:
up to 600 N per worktop
up to 2200 N for full trolley
- High stability with advanced sheet steel construction

■ Functionality

- Suitable for the most varied areas of application: e.g. receiving goods, picking up goods, PC or printer station

■ Cable management

- Safe cable routing with two cable ducts integrated in the extrusion
- Clear and orderly cable management with integration of accessory parts, e.g. a socket strip, which can be mounted on the extrusion.

■ Well-thought out solutions

- Vision and contact protection provided by the easy "on-off" rear panel, no tools needed
- Orderly arrangement of small material with drawer module with removeable small parts tray
- Smooth running 3/4 pull-out "Quattro" guide

MOB00273

MOB00266

MOB00272

MOB00323

MOB00271

■ Stability

- Total load rating of up to 2100 N
- Worktops each with up to 800 N load rating
- High stability with low-lying centre of gravity
- Torsional strength with stable aluminium extrusions on die-cast aluminium stabilizers and crosspiece of sheet steel
- Optimal stability for equipment set up in the trolley with raised edges all around the worktop

■ Convenience

- Optimisation of operation with additional module components, such as
 - Cable duct
 - Rear panel
 - Euro mains distributor
 - Master switch
 - Socket strip
- Ergonomically optimal adjustment with
 - Keyboard extension with side mouse table
 - Tilttable shelves
 - Pull-out shelves
- Effortless management of obstacles and uneven floors with Ø 125 mm large smooth-running castors
- Positioning with 2 lockable castors
- No marks and scratches on the doors, panels and fittings due to the integrated plastic impact protection

■ Variability

- Variety of individual models are possible with 12 basic modules with 6 heights and 3 widths
- Multiple applications from simple storage trolley to complex medical trolley
- Simple and quick adjustment without special tools

dacomobile System Components

Technical data

MOB00276

- Modules can be installed at increments of 50 mm
- Smooth-running castors, \varnothing 125 mm, 2 with stopper

Material

Basic rack consists of:

- Extrusions: extruded aluminium
- Stabilizers: die-cast aluminium
- Crosspiece: sheet steel

Worktop:

sheet steel / plastic

Other modules: combination of plastic with sheet steel and laminated sheet

Finish

Metal parts: powder-coated texture

Laminated sheet: fine textured

Plastic parts:

coated texture

Colour

Extrusions, rockers, castors, handles:

RAL 5003 sapphire blue

Other parts:

RAL 7035 light-grey

Maximum static load rating

Per basic rack: 2100 N

Per castor: 750 N

Surface load per worktop:

up to 800 N

How supplied

Fully assembled

elimobil

Strong points

Aesthetics

- Modern and slim look with dynamic shapes
- Extrusions and die-cast rockers in modern design with narrow crosspiece
- Side panels of the shelves dynamically shaped
- Cable ducts are aesthetic and space-savily integrated into the extrusion

Functionality

- High EMC safety with separate cable routing of mains and data cables
- Storage space in the crosspiece for socket strips and excess cables
- Space-saving with optional use of surface areas with 2 basic widths* (450 mm and 550 mm)
*useable internal dimension between the extrusions
- Worktop can be loaded up to 300 N (overall load rating of the trolley: up to 1800 N)

Variability

- Numerous individual models possible
- All modules can be combined and mounted in the easiest possible way
- Individual configuration with adjustment of the installation components at 25 mm intervals
- Simple and quick adjustment without special tools

Convenience

- Easy to clean with coated surfaces
- All surfaces are corrosion-free, impact and scratch-proof and acid and disinfection agent-resistant
- Vibration-free and noiseless transport with special rubber smooth-running castors \varnothing 100 mm

elimobil System Components Technical data

- Modules can be installed at increments of 25 mm

■ Maximum static load rating

- Per basic frame: 1800 N
- Per castor: 750 N
- Surface load per worktop: 300 N

■ Material

Basic rack consists of:

- Extrusions: extruded aluminium
- Rockers: die-cast aluminium
- Crosspiece: sheet steel

Worktops: sheet steel/plastic

Storage shelf, storage tray: sheet steel

Drawer module consisting of:

- Main unit, panels: plastic laminate-coated

■ Finish

- Metal parts: powder-coated texture
- Laminated sheet: fine textured
- Plastic parts: coated texture

■ Colour combinations

Final digit of order number.2:

- Basic frame: RAL 7035 light-grey
- Plastic handles and caps: RAL 5003 sapphire blue
- Castors: RAL 9011, graphite black

Final digit of order number 0.4:

- Basic frame: RAL 7035 light-grey
- Plastic handles and caps: RAL 5018 turquoise blue
- Castors: RAL 9011, graphite black

■ How supplied

Fully assembled

Want to get to know us better? We are always just a click away.

It really is almost totally unimportant where you happen to be on the face of the earth! If you want to let yourself be impressed by the Knürr Group range of product and services, numerous platforms are always available at your fingertips. Internationally represented in 32 countries world-wide and with domestic companies and overseas affiliates, we are strategically best positioned for you and your requirements.

On the Internet at **www.knuerr.com** in addition to current news and updates, you will find our entire product range, including technical data, press releases and background information and specialist articles. Knürr product experts are always present at numerous national and international trade fairs to answer your questions and provide you with specialist advice.

If you want to implement your workstation systems with the Knürr Group, we're ready and waiting to come to you!

Modular TFT Monitor Wall

The network-capable LCD monitor wall from Knürr

- The modular set-up enables pre-configuration as requested by the customer
- Up to 16 TFT displays 19" or 17"
- Configuration of 12 x 19" displays with 1 x 32" TFT
- The 32" TFT display can be set at any position!
- The TFT displays are standard equipped with these interfaces for smart Panel VGA or connection:
 - VGA
 - SVHS
 - DVI
- Direct connection of the TFTs, e.g. to video cameras and computers, or:
- In conjunction with monitor management computers:
 - Individual window or full frame for data and/or video
 - VGA or DVI and SVHS image processing
- 19" mounting for computers (4 HU hanging) in the support base
- With support base for storing cables and technology
- Low installation depth – lower space requirement
- Low thermal stress
- Low energy consumption

Areas of Application

- Network operation centres
- Operations control consoles with police forces, fire departments and rescue services
- Security, video monitoring
- Info terminals at airports, train stations, banks, stock exchanges, etc.
- Traffic control technology, e.g. traffic light monitoring, underground system monitoring
- TV studios, e.g. direction, production, editing
- Reception areas, corporate lobbies
- Marketing

Computer data (for 16-piece monitor wall)

Rack:	19" rack, 4 HU ATX
Network:	10/100 Base TX (RJ45) TCP/IP, Net BIOS, IPX/SPX
SOFTWARE:	
Operating system:	WINDOWS ©NT4.0, WINDOWS ©2000, WINDOWS ©XP, RedHat Linux 7.1
VIDEO INPUTS:	
Video sources can be freely positioned and adjusted in size on the desktop.	
4 Video sources per output board can be displayed at the same time.	
Video standards:	All TV standards, such as, PAL/NTSC/SECAM
RGB-INPUTS:	2
OUTPUT BOARD:	
Graphic outputs:	16 + 1 (from main board)
Resolution:	800 x 600, 1024 x 768, 1280 x 1024, 1600 x 1200 up to 32 bits per output
Colour depth:	8-bit (256 colours), 16-bit (65,536 colours) or 32-bit (16.7 million colours)

*) Subject to technical changes

Rapomos - Electro-Mechanical Components

Applications

Knürr's electronic workstations ensure safety at every level. Due to the Plug & Play system, the 19" superstructures for the ESD-tested Elicon or SAM product lines are easy to equip with modular electronic components, 19" plug-in units and bus systems. Antistatic powder coating on all levels provides optimal protection for electronic components. An extensive product range of electric and electronic components is available for the mini distributor set-up, which is compatible with Dacobas, Elicon and SAM.

rapomos Strong points

■ **The laboratory system for electricians and electronic engineers based on the Knürr furniture system of your choice. Configure your own individual laboratory workstation.**

- 19" Superstructures (3HU and 6HU), suitable for Elicon and SAM furniture systems
- Mini distributor, suitable for all Knürr furniture systems
- Modular electro/electronic-components
- Wide range of accessories

■ **Easy to equip**

- Modular electronic components
- cassette technology
- BUS system

■ **Individual configuration**

- Research & Development
- Production
- Inspection and Tests
- Service
- Other applications

■ **Ergonomic and User-Friendly**

- Worktop surfaces: variable height adjustable
- Superstructures: variable tilt levels
- Easy view LCD displays
- Full illumination of the worktop level

RAP00195

RAP00194

rapomos

Strong points

RAP00197

Flexibility

- Individual combination and arranging of the functional modules/components
- Quick start-up operation with preassembled and wired superstructure units
- Easy exchange of modules/components on the rapomos superstructure with integrated power supply bus system, and consequently, optimal adjustment
- Variable system link-up with the extensive Elicon or SAM workstation-superstructure ranges

RAP00133

SAM20041

RAP00132

RAP00135

RAP00193

RAP00139

RAP00137

rapomos Strong points

Safety

- Insensitive to short-circuit and operating errors
- Master switch fields as standard with emergency STOP link-up
- All functional modules are CE compatible and comply with the European standards regulating safety and EMC requirements
They are insensitive to external disturbances

Load rating

- Additional load rating of the fully equipped 19" structure of max. 750 N on the overall width

Ergonomics

- Uniform equipment control using standard allocation of the control components and display units with all modules
- Modern workstation lighting for shadow-free illumination and safety
- Variable height setting of the worktop surfaces and superstructures
Tilt variability of the 19" superstructure with
 - Assembly-set tilt setting of +/- 6° at 3° intervals

or

- Variable tilt setting of +/- 6° per crank handle

Visualisation

- Important parameters displayed via LC display

Cable management

- Spacious horizontal and vertical cable ducts

rapomos 19" Structural Rack for SAM

- For mounting 19" modular chassis' and rapomos modules
- Structural rack with or without mains power supply bus, this includes
 - Connection cable approx. 2.5 m with protective contact plug
 - Modular terminal block per 19" panel with connection of up to 6 individual devices
- Max. installation depth: 445 mm
Max. installation depth with mains power supply bus: 375 mm
- Assembly-set tilt setting of +/-6° in 3° increments or variable tilt setting of +/-6° with the crank handle
- Variable height adjustment
- High 19" construction load rating per 19" chassis, 3 HU = 200 N (example: with a 19" construction of 6 HU with a width of 1600 mm and a mounting of 6x19" chassis', the load rating is 6x200 N = 1200 N)
- Additional storage level with high surface load capacity of 750 N
- Integrated ventilation concept for optimal cooling
- Service-friendly with easy mounting

Material / Finish

- Housing: sheet steel, conductive, powder-coated texture, RAL 7035 light-grey

Supply schedule

- 1 19" Structural rack
- 2 Chassis rails per 19" / 3 HU installation panel

RAP20013

Adjustable Alternating Voltage

- For earth-free operation of test specimens
- Integrated isolating transformer
- Voltage can be set from 0 to max. value using isolating transformer

Material / Finish

- Front panel: Aluminium plate, 2.5 mm Painted RAL 7035 light-grey, smooth Design-overprint RAL 7004 signal-grey, silk-matt

Technical data

- Output voltage 0-260V AC, adjust., earth-free max. 1.6 A
- Output current max. 1.6 A
- Power supply voltage 230 V AC
- Circuit breaker max. 16 A
- Display 1x current reader, 1x voltage reader, digital 3-digit, each with true RMS rectifier
- Primary protection Thermal circuit-breaker 2 A
- Secondary protection Thermal magnetic circuit breaker 1.6 A

RAP20059

Soldering/Desoldering Station

Description

The WELLER WMD 3 control device is designed for the simultaneous operation of 3 soldering tools. Three channels are available for this. A special adjustment is not required to enable the microprocessor to automatically recognise the attached tool and activate the corresponding control parameters.

The temperature control is made on a digital basis, whereby the required process parameters can be entered via four keys. The entered parameters also remain after the device has been turned off.

Various time functions, such as temperature reduction to 150°C at soldering or desoldering irons or time limitation for the ion-free hot air current can be easily set.

The device has a built-in high-performance pump. This is started using a finger switch integrated in the hand tool. The supply unit has a vector manometer to display the vacuum. The contamination level of the filter cartridge is also displayed here.

Material / Finish

- Front panel: Aluminium plate, 2.5 mm Painted RAL 7035 light-grey, smooth
- Design-overprint RAL 7004 signal-grey, silk-matt

Technical data

- Power supply voltage 230V AC
- Circuit breaker max. 16A
- Power consumption 300W
- Fuse Fine-wire fuse T 1. A
- Regular tolerance Soldering and desoldering irons ±2% from final value, hot air pencil ±30°C
- Heating outputs 3x80W/24V
- Temperature control Soldering and-desoldering irons, variable 50-450°C
- Pumps Hot air pencil, variable 50-550°C
- Max. neg. pressure, 0.7 bar
- Max. transporting capacity, 20 l/min.
- Hot air, max. 10 l/min.

The mini distributor is based on an innovative aluminium extrusion. T-slots and screw channels are used to mount trade standard installation technology. At the front the mini distributor can be equipped with 3 HU front panel sections. With the side adapter, the mini distributor can be mounted on the Dacobas, Elicon or SAM workstation systems.

Mini Distributor

Strong points

RAP20034

- Aluminium extrusion with antistatic powder coating
- Easy assembly, can be upgraded at any time
- Versions for all Knürr desk and workbench systems
- Can be mounted at angle $\pm 5^\circ$
- Flexible installation of the most varied electro components in screw channels and T-slots for spring nuts M4 – M6
- Trouble-free cable separation using retrofittable metal brackets
- Front panels must only be screwed at the top, plugged at the bottom
- Front panels earthed with earthing spring strips
- Lateral tolerance equalization of the front panels of up to 7 HP with frontal folding of the side panels

 Height: 45.5 mm
 Casing width: 44.4 mm (= 1 HU)
 Cable feed: 2.5 m

Approvals

CE label in accordance with the low potential guideline 73/23/EWG, EMC guideline 89/336/EWG
 VDE Certificate

Colour combination

Final digit of order number .1:
 RAL 7035 light-grey
 Plastic parts: RAL 7035 light-grey

Technical data

Overvoltage protection and mains filter:
 Mains voltage: 230 VAC +/- 10 %
 Nominal current 16A
 Feature class: D (refined protection in accordance with DIN VDE 0675)
 Surge current resistance (8/20 µs wave): max. 10 kA
 Protection level (1.5/50 µs wave): < 1500 V (L/N against PE)
 Mains filter (high-stop): attenuation at 1MHz: > 45 dB
 Master-slave function:
 Threshold setting range
 On: 20 mA - 200 mA (approx. 55 mA, supply status)
 Off: 16 mA -160 mA (approx. 44 mA, supply status)
 Switching delay 550 ms +/- 20 %
 Electronic module, 2-pole switching

Supply schedule

- 1 Socket strip
- 2 Mounting brackets

DI-STRIP GST18 Plug System (Wieland) Compact Standard DIN 49 440 (VDE)

- Quick and efficient plug connection system
- Plug-in electro-installation in place of conventional wiring
- Speed:
 - Due to simple plugging together of preconfigured elements
- Flexibility:
 - Due to the cable (cable length)
- Efficient:
 - Easy exchange of socket strips, without cabling expenses
- Safety:
 - Due to plug system, all faulty installations are excluded
- Space-saving:
 - Use of protection and switching functions can be extended to additional socket strips with no loss of plugging space by extending cable (maximum load rating of 16 A)

Material / Finish

Casing: closed sheet-steel extrusion, zinc-plated, powder-coated texture
 Plastic parts: polyamide PA6 (UL 94 V0), recyclable
 Internal conductor: full-length busbar, brass

Dimensions

Socket spacing: 50 mm
 Height: 45.5 mm
 Casing width: 44.4 mm (= 1 HU)
 Cable feed: 2.5 m

DOS20030 With mains filter

DI-STRIP Power Cleaner Standard CEE 7 V (UTE) / France

- With integrated mains filter
- The integrated mains filter prevents,
 - high frequency disturbances from the mains affecting electronic equipment.
 - the transmission of disturbances from the equipment to the mains.
- The mains filter meets the requirements of VDE 0565-3 and EN 133200.
- 19" Installation option (with length 483 mm)
- Socket rotation: 45°
- Cable feed: H05VV-F 3G 1.5 mm²
- Moulded right angle plug

Material / Finish
Casing: closed sheet-steel extrusion, zinc-plated, powder-coated texture
Plastic parts: polyamide PA6 (UL 94 V0), recyclable
Internal conductor: full-length busbar, brass
Cable feed: PVC

- Dimensions**
Socket spacing: 50 mm
Height: 45.5 mm
Casing width: 44.4 mm (= 1 HU)
Cable feed: 2, 5 m
- Approvals**
CE Label in accordance with the low potential guideline 73/23/EWG, EMC guideline 89/336/EWG
- Colour combination**
Final digit of order number .1:
RAL 7035 light-grey
Final digit of order number .6:
Casing, RAL 2003, pastel orange
Plastic parts: RAL 7035 light-grey
- Load rating**
250 VAC/16 A
- Supply schedule**
1 Socket strip
2 Mounting brackets
2 19" mounting brackets (additional with 19" installation option)

DOS20031

DOS20032

DI-STRIP Safety Basic Standard CDD 7 V (UTE) / France

- With overvoltage protection
- A combination of varistors and gas discharge arresters guarantee a rapid response and high discharge capacity
- Simple but effective protection against indirect strikes and voltage spikes from the mains
- Double protection:
 - 1. Up to max. surge current resistance, transient overvoltages are reduced to non-damaging values
 - 2. If the surge current resistance is exceeded, the connected equipment is separated from the mains to protect against further overvoltage spikes (the green function display goes off). The protection module must then be changed for further use.
- To increase the protection function, a coarse filter should be switched in advance in the building installation.
- 19" Installation option (with length 483 mm)
- 2 Versions: Standard side panel or Design side panel
- Socket rotation: 45°
- Cable feed: H05VV-F 3G 1.5 mm²
- Moulded right angle plug

Material / Finish

Casing: closed sheet-steel extrusion, zinc-plated, powder-coated texture
 Plastic parts: polyamide PA6 (UL 94 V0), recycleable
 Internal conductor: full-length busbar, brass
 Cable feed: PVC

Dimensions

Socket spacing: 50 mm
 Height: 45.5 mm
 Casing width: 44.4 mm (= 1 HU)
 Cable feed: 2, 5 m

Approvals

CE Label in accordance with the low potential guideline 73/23/EWG, EMC guideline 89/336/EWG

Colour combination

Final digit of order number .1:
 RAL 7035 light-grey
 Final digit of order number .6:
 Casing, RAL 2003, pastel orange
 Plastic parts: RAL 7035 light-grey

Technical data

Mains voltage 230 VAC +/- 10 %
 Nominal current 16A
 Feature class: D (refined protection in accordance with DIN VDE 0675)
 Surge current resistance (8/20 µs wave): max. 10 kA
 Protection level (1.5/50 µs wave): < 1200 V (L/N against PE)

Supply schedule

- 1 Socket strip
- 2 Mounting brackets
- 2 19" Mounting brackets (additional with 19" installation option)

DOS20048 GST 18 with switch

DOS20047 GST 18 without switch

DI-STRIP Compact GST 18 Plug System (Wieland) Standard CEE 7 V (UTE) / France

- Quick and efficient plug connection system
- Plug-in electro-installation in place of conventional wiring
- Speed:
 - Due to simple plugging together of pre-configured elements
- Flexibility:
 - Due to the cable (cable length)
- Efficient:
 - Easy exchange of socket strips, without cabling expenses
- Safety:
 - Due to plug system, all faulty installations are excluded
- Space-saving:
 - Use of protection and switching functions can be extended to additional socket strips with no loss of plugging space by extending cable (maximum load rating of 16 A)

Material / Finish

Casing: closed sheet-steel extrusion, zinc-plated, powder-coated texture
 Plastic parts: polyamide PA6 (UL 94 V0), recyclable
 Internal conductor: full-length busbar, brass

HEI00379

Distribution box

- For mounting DIN rail components from the installation technology, such as fuses, clamps, relays etc.
- If built-in, the mounting level can be pulled out at the front, locked in position, and as a result, significantly simplifies the wiring of the individual components
Not with "Fixed installation" version
On request: Can be delivered ready equipped and wired
Other variations and versions on request
- Installation space for up to 22 pieces of equipment with 18 mm width each
- Mounting of the TS35 DIN rail on several levels with simple plug-in connection
Not with "Fixed installation" version
Other variations and versions on request
- "Snap-in" mounting of DIN rail components
- Easy access to the protective earth and neutral conductor rails from the front
- Various positioning options prepared for N and PE rails
Not with "Fixed installation" version
On request: Can be delivered ready equipped and wired
Other variations and versions on request
- Cable entry at the rear via double brush strip (optionally via bushing sockets)
- Cable strain relief on the inside and therefore accessible from the front
- Labelling strips on the front, above and below the installation space
- Installation options for power distribution with 230 V AC, but also in the low voltage range (e.g. 48 V DC)
- 19" Chassis, 3 HU, depth 150 mm

Material / Finish

- Covers, powder-coated texture, RAL 7035 light-grey
- Body, sheet steel, zinc-plated

Supply schedule

- 1 Distribution box
Including N and PE rails, cable entry, cable strain relief, empty panel covers and earth set

How supplied

- Fully assembled

Want to get to know us better? We are always just a click away.

It really is almost totally unimportant where you happen to be on the face of the earth! If you want to let yourself be impressed by the Knürr Group product and services range, numerous platforms are always available at your fingertips. Internationally represented in 32 countries world-wide and with domestic companies and overseas affiliates, we are strategically best positioned for you and your requirements.

On the Internet at **www.knuerr.com** in addition to current news and updates, you will find our entire product range, including technical data, press releases and background information and specialist articles. Knürr product experts are omnipresent at numerous national and international trade fairs to answer your questions and provide you with specialist advice.

If you want to implement your workstation systems with the Knürr Group, we're ready and waiting to come to you!

Lamps

Important information

Our workstation lamps are supplied as standard with a universal adapter. Please order the corresponding adapter for the respective piece of Knürr furniture for your lamps.

Lamp adapter for dacobas product line: BN 00.350.156.x

Colour

.1 = RAL 5008, grey blue

Supply schedule

1 Adapter bolt
1 Cap, 3/4

elicon

- For desk with side panel height 760 mm
BN 00.351.031.7
(for mounting on the vertical extrusions, above)

- For control console workstation with side panel heights 1610 mm and 2060 mm

BN 00.350.157.x

(for frontal mounting on vertical extrusions)

Colour

.1 = RAL 7035 light-grey
.9 = RAL 7021 dark-grey

Supply schedule

1 Adapter set

ELI00056

Office and EDP - Workstation Lamp "Delight"

Technical data

- Office and EDP workstation lamp "Delight"
- 2 Compact fluorescent tubes, 9 watt each
- Coated parabolic grid in luminaire head prevents direct or reflected glare
- Supply voltage: 230 V/50 Hz
- Series reactor in the mains plug
- Lamp casing made of impact-resistant plastic with 3-D joint
- Joints, spring relieved
- Weight, 2.2 kg

Dimensions

- Column 445 mm
- Arm 400 mm
- Luminaire head 223x210x57 mm
- Mains cable, approx. 2.5 m, Euro plug

Colour

- Final digit of order number .2:
- Rods/bars: RAL 7035 light-grey
- Luminaire head: RAL 5010 gentian blue

Supply schedule

1 Workstation lamp
1 Universal mounting adapter

W	H	D	Model	Order no.	UP
				00.350.152.2	1 unit

DAC00390

Office and EDP - Workstation Lamp "Cirrus"

Technical data

- Compact fluorescent tube, 18 watt
- Coated parabolic grid in luminaire head prevents direct or reflected glare
- Supply voltage: 100/120/230 V; 50/60 Hz
- Electronic series reactor in the luminaire head
- Joints, spring relieved
- Luminaire head made of impact-resistant plastic

Colour

- Final digit of order number .2:
- Rods/bars: RAL 7035 light-grey
- Luminaire head: RAL 7035 light-grey
RAL 5010 gentian blue

Final digit of order number .9:

- Rods/bars: RAL 9005 black
- Lamp body: RAL 9005 black

Supply schedule

1 Workstation lamp
1 Universal mounting adapter

DAC20095

Office and EDP - Workstation Lamp "Diva"

Technical data

- Compact fluorescent tube, 11 watt
- Coated parabolic grid in luminaire head prevents direct or reflected glare
- Supply voltage, 230-240V/50/60 Hz
- Electronic series reactor
- Joints, spring relieved
- Luminaire head and lamp rods/bars: aluminium extrusion, anodised.

Colour

- Final digit of order number .9:
- Rods/bars: aluminium colours, anodised
- Housing: aluminium colours, anodised

Supply schedule

- 1 Workstation lamp
- 1 Universal mounting adapter

Dimensions

- Column 475 mm
- Arm 396 mm
- Luminaire head: Diameter 68x386 mm
- Mains cable, approx. 3 m, Euro plug

W	H	D	Model	Order no.	UP
				00.350.158.9	1 unit

DAC20081

Office and EDP - Workstation Lamp "Campus"

Technical data

- 2 Compact fluorescent tubes, 9 watt each
- Prism grid in luminaire head prevents direct or reflected glare
- Supply voltage: 230 V/50 Hz
- Series reactor in luminaire head
- Luminaire head made of impact-resistant plastic with 3-D joint

Dimensions

- Column 400 mm
- Arm 325 mm
- Luminaire head: 163x215x5 mm
- Mains cable, approx. 2.9 m, Schuko plug

Finish

- RAL 7035 light-grey

Supply schedule

- 1 Workstation lamp
- 1 Universal mounting adapter

W	H	D	Model	Order no.	UP
				00.350.154.1	1 unit

DAC20120

Stand Lamp "Legato"

Technical data

- 4x55 watt compact fluorescent lamps
- Power consumption: approx. 235 watt
- Weight: approx. 21 kg
- Support base, free-standing
- Connection: protective contact plug, approx. 3 m
- Supply voltage: 230-240 V / 50/60 Hz
- Light distribution: symmetrical
- Electronic series reactors
- Light flux (packed): 19,200 lm
- Approx. 10% fine grid – direct portion
- Power switchable, 0-2-4
- Switch integrated in the luminaire head
- Luminaire head can be rotated by 90°
- Lamp base, C-shaped, flat

Material

- Lamp body: fine grid, sheet steel
- Lamp rods/bars: round steel tube, diameter, 35 mm

Finish

- Final digit of order number .9:
- Lamp housing and lamp bars/rods: metallic silver

Supply schedule

- 1 Stand lamp

W	H	D	Model	Order no.	UP
				00.350.155.9	1 unit

DAC20096

Stand Lamp "EOS"

Technical data

- 4x55 watt compact fluorescent lamps
- Power consumption: approx. 235 watt
- Weight: approx. 20 kg
- Base, free-standing
- Connection: protective contact plug, approx. 3.0 m
- Supply voltage: 230-240 V / 50/60 Hz
- Light distribution: mostly indirect
- Luminaire head can be rotated by 90°
- Reflector removable, for easy cleaning
- Lamp base: C-shaped, flat
- Switch: multifunctional switch
- Operating equipment: EVG

Material

- Lamp housing: aluminium/plastic
- Lamp rods/bars: round steel tube

Finish / Colour

- Lamp body and lamp bars/rods: metallic silver

Supply schedule

- 1 Stand lamp

Dimensions

- Lamp body: 570x475x53
- Total height, 1900 mm
- Round steel tube, diameter, 35 mm

RAP00191

Underfit Lamp for Elicon With adjustable reflector

- For glare-free, balanced lighting of the overall work surface
- Lamp reflector can be adjusted for optimal lighting conditions
- Lamp housing with removable cover
- LS lamp with electronic trigger
- Parabolic grid, glare-free
- Mains switch on the front
- Protection rating, IP 20, protection class 1
- Mains cable: 3 m
- Supply voltage: 230 V/50 Hz

Material / Finish
Lamp housing of sheet steel, powder-coated texture, RAL 7035 light-grey

Supply schedule
1 Underfit lamp
Mounting material

ESD Workstations

- When computers go crazy, alarm systems no longer send warnings or cash registers simply refuse to work, the gremlin at work is quite often easy enough to identify: Static Electricity.
- The sustained development of highly integrated circuits results in increasingly more efficient (and constantly getting smaller!) equipment. Therefore it is all the more important to determine the growing sensitivity of **electrostatic endangered components**. In order to eliminate CMOS-ICs or MOSFETs, voltages of 100 – 200 Volt are indeed already sufficient.
- Activated by modern plastics, artificial fibres in clothing and carpets, and by low humidity in centrally-heated rooms, high voltages are often generated. Depending on the shoe material, speed and humidity, a person walking across a carpet can be loaded with between 2000 and 20,000 volts.
- No question about it! The safety of electronic components can no longer be guaranteed with such effects (not to mention the well-being of the operating personnel).
- With the ESD workstations from Knürr, the perfect operations-oriented workstation equipment is now available.
 - Site insulation in accordance with VDE 0100, § 24 and DIN 57 680 part 2.
 - Protection of electronic components against static electricity (EN 100 015)

The Basics

The generation of electrostatic charges cannot always be prevented. Therefore the discharge must be specifically "influenced".

Influenced means: All discharge processes must run controlled and calculable.

The calculable discharge process is described by the following exponential function:

$$U(t) = U_0 e^{-t/RC}$$

U_0 = Initial voltage of the capacitor

R = Leakage resistance

C = Capacity

By activating the equation towards R , an equation is generated with which an ideal leakage resistance can be ascertained.

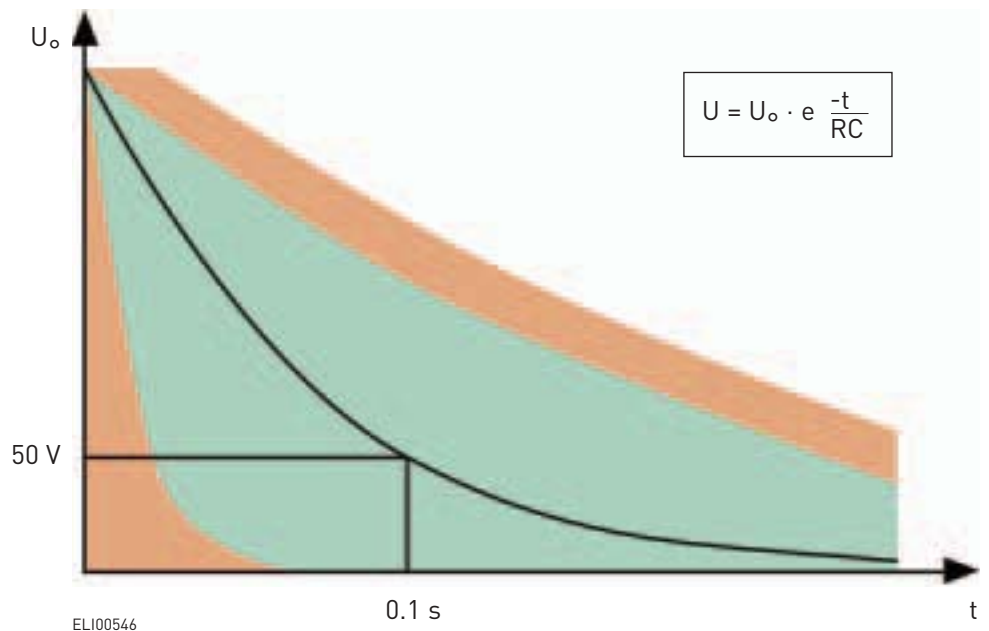

$$R_e = \frac{t_{zul}}{C \cdot \ln(U_0/U_{zul})}$$

The optimal discharge curve is consequently achieved. Assuming that the voltage (U_0) must be reduced within 0.1 sec (t_{zul}) to 50 V (U_{zul}) so that the electrostatic endangered components are not under high voltage for too long, the leakage resistance therefore acts as the regulator for a controlled discharge.

Of course, for the safety of the endangered electronic components it is also helpful if charges can be prevented before they are generated by equalising the different potentials. Conductive work and unit surfaces, plastic parts made of conductive materials, the connection of all parts with one another and with the ESD body are all required for this purpose.

Easily accessible connections for ESD potential equalization, e.g. for measuring and soldering equipment, must be available at each workstation. A cable is provided for the safe connection between workstation and ESD potential equalization. Easy release connection points for armbands and other potential equalization conductors are also provided.

Discharge curve of electrostatic charges

- Also included in safeguarding equipment are drawers and storage spaces inside and outside which are made of conductive material for further preventing charges from building up.
- With **Knürr ESD workstations**, all the necessary requirements are satisfied. For this very reason, both the complete workstation itself and work pieces, tools and operating personnel are all on an equipotential line. If potential differences occur as a result of rubbing or for whatever other cause, safe charge equalization or charge dissipation via earth is implemented immediately.

■ Conductive materials

Last, and certainly by no means least, the safety equipping of Knürr ESD workstations has been made possible with the advances in the development of conductive materials (plastics, laminates, paints).

Thanks to these materials we can now successfully unite both **ergonomic requirements** and **modern design** and **safety** in one system.

■ Diverse areas of application

Highly sensitive components do not require just direct protection at electronic workstations; the safety equipping of all other work areas is just as important in this respect. They must also be equipped with conductive desks, chairs, racks, transport trolleys and containers.

If you follow the path of electrostatic endangered components via transport – laboratory – test area – production – goods output control – packaging to dispatch it soon becomes evident that ESD room equipment and ESD accessories have become an indispensable necessity.

- Each of these stations is a part of the quality chain, and as with every chain, a single weak link nullifies the capacities of the other segments.

■ Knürr ESD workstations provide a comprehensive safety solution.

SAM00346

ESD Components Static-safe-set

- Complies with DIN EN 100 015 and VDE 0104
- Includes the basic components required for equipping a workstation for electrostatic protection

Technical data

- Surface resistance in accordance with EN 100 015 $10^7 \Omega$
- Connection contacts: press studs, 4.5 mm

Supply schedule

- Floor mat, 1200x1800 mm, wheelchair compatible
- Desk mat 600x900 mm, heat-resistant up to 500°C
- Earth wristband, variable adjusting, 1 MOhm protective resistance on the wristband side
- Earth cable, 1.5 m with contact

Modular Frame

For mounting modular panels without tools

- Modular frame for taking module panels, who are supplied customer-specific
- The modular frame can be installed in both wooden and metal panels
- In the joint area of the module panels, an underlay strip which can be set in the 12 mm increment serves as sealing
- Module panels can be removed without tools at any time and reinstalled at any other position
- Retaining strips for the module panels are released with unlocking lever which is also supplied
- A brush strip is placed on the front of the module frame and serves for routing cables and also provides dust protection.

Colour
Modular frame body and underlay strips, RAL 7035 light-grey
Modular frame trim and retaining strips, RAL 9006 white aluminium

Supply schedule
1 Modular frame with retaining strips and brush strip
Underlay strips adjusted for modular panel widths at multiples of 120 mm
1 Unlocking lever (plastic)
Mounting material

How supplied
Pre-assembled

Material / Finish
The modular frame body, module frame trim, retaining strips and underlay strips are sheet steel and have a powder-coated texture

Knürr Cabinet

Technical data

- Wooden main unit bonded
- Cabinets with/without plinth are height-adjustable with 4 levelling screws
- Superstructure cabinets without plinth and levelling components
- All cabinets can be locked with cylinder lock or coloured olive-shaped handle with cylinder lock
- Sliding door cabinets are fitted with a centre panel

Material

- Main unit, doors, side panels, bottom covers and rear panels: three-layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- Compartments and shelves: sheet steel

Finish

- Main unit: laminated particle board, fine texture
- Metal parts: powder-coated texture

Dimensions

- Heights: 2, 3, 4 FH
Cabinet height 720 mm, adjustable with levelling feet to cabinet height 750 mm
- Depths: 430 mm (with postformed top 440 mm)
- Widths: 800, 1200 mm
- Thickness: Main unit, bottom covers 22 mm
Doors, side panels 19 mm
Rear panels 13 mm
Glass doors 6 mm

Colour

- Final digit of order number .2:
- Main unit and sliding doors: light-grey
- Shelves, RAL 7035 light-grey
- Final digit of order number .5:
- Main unit and shelves: RAL 7021 dark-grey
- Sliding doors, beech finish

Standards

- DIN 68761 for main unit and postformed top
- EN 438 for coating material
- DIN 16926 for high pressure laminated sheet

Note

Cabinet cover as postformed top: A postformed top can be set on top of each cabinet. This top is adjusted to the elicon technical furniture range and must be ordered extra. For 2 U-cabinets that are linked to workstations, there is a version with integrated postformed top, which are then adjusted to the worktop height.

Supply schedule

- 1 Wall-standing cabinet with sliding doors

How supplied

- Assembled

Knürr Cabinet Strong points

1 ELI00518

1 A series of cabinets are available without plinth and can therefore be used as stacking cabinets. These cabinet variants enable numerous individual combinations to be created.

2 Even heavily loaded cabinets can be comfortably adjusted with the height adjuster from above.

3 A single safety glass panel is always used with cabinets with glass doors. All cabinets can be locked, including those with glass doors.

4 The free-standing drawer units can be height-adjusted so that they can be placed beside the workstation (desk), while mobile drawer units are mainly placed under the desks and are nonetheless always mobile. Drawer trims and handles create an ergonomic unit - safe and easy to handle.

5 All drawer units can be locked and have a drawer catch.

6 The utility tray runs on plastic runners, all other drawers run on telescopic slides, whereby the 6 OU drawer can be fully pulled out.

The telescopic slides are covered to prevent any kind of injury.

7 Additional shelves and other accessories supplement the cabinet range.

Control Station Chair, Controller

- For 24-hour use in control and monitoring centres, operations control consoles or air traffic control towers
- Wide ergonomically formed upholstery
- Side surfaces covered with leather, centre area with material for excellent humidity regulation and breathing
- Head support can be adjusted in height and tilt
- Backrest tilt, 0°-16°
- Dynamic state (seat and backrest surface in combined movement) and free springing state (fixed seat and backrest surface but springing setting)
- 10 cm wide, lift-up and height adjustable armrests
- At the lower back, the backrest is equipped with an inflatable pelvic support
- The pivot point for the backward tilt of the Controller is directly under the front of the seat pan. The feet consequently always remain on the floor and the blood flow is never disturbed.

Technical data

- Width and height of the backrest 52x60 cm
- Width and height of the seat surface 52x60 cm
- Width and height of the headrest 52x60 cm
- Width and length of the armrests 9.5x34 cm

SAM80004

Industrial Chair

Technical data

The Sintec chairs each consist of a "basic" chair and the corresponding padding set (seat surface and backrest) of material or integral foam. The extremely sturdy fitting is made using Velcro strips.

Ergonomic seating design

An anatomically shaped seat surface automatically supports the correct sitting position and provides permanent contact for the upper body to the backrest.

The integrated pelvic support prevents the pelvis from sagging.

The vertebra is maintained in its anatomically natural S-shape, the discs are significantly relieved and sitting with a "round back" is never permitted, right from first use.

The rounded-up front seat edge reduces pressure strains in the upper thigh area. Blood build-ups in the legs is also prevented.

An integrated "anti-slide arch" prevents the body from sliding forward both when sitting leaning forward and when leaning back.

The supportive contact for the backrest is always maintained.

Spacious seat surface dimensions provide optimal sitting comfort. Seat width 48 cm, seat depth 42 cm.

Backrest designed with the body shape in mind

The flexible upper part of the backrest provides springing support for all body movements. The upper body is relieved, the blood flow of the back muscles is provided with the correct support.

The integrated spinal support ensures optimal relief for the back in the vertebral area and prevents sitting with a curved back.

The specifically reduced backrest width in the upper area provides optimal room for movement for arms and upper body. A high backrest (420 mm) supports the entire vertebra over a large surface. The grooves worked into the seat surface and backrest ensure optimal air circulation and a healthy microclimate of the work-environment chair.

Integral Foam Upholstery Blue

- Integral foam upholstery

The integral foam upholstery ensures soft and comfortable "air-cushioned sitting", can be washed and is easy to clean. It is also resistant to light acids and caustic solutions.

The structured surface ensures the most optimal airflow for micro-climate comfort.

The partition walls enable a new form of office arrangement: individual modules can be rapidly combined to enable various configurations and at any angle from 90° to 180°. The modularity allows the employee to work in quiet and concentrate, or - if required - to arrange a communicative workstation environment. The partition walls are available with a comprehensive range of accessories, can be easily mounted and can be set up at absolutely any location.
